

Monitoring Violations Annual Notice
Important Information about your drinking water
Monitoring Requirements Not Met for:
Springlake-Earth ISD

Our system failed to collect every required coliform sample. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether our drinking water meets health standards. During the month of April of 2025 our testing for coliform bacteria did not get returned to TCEQ, and therefore we cannot be sure of the quality of your drinking water during this time.

What Should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, we are required to notify you within 24 hours.

What is being done?

We have determined that the sample for coliform was collected for the month of April 2025, but we have not determined why this data was not transmitted to TCEQ. We will investigate the cause of this breakdown in communication and correct it.

For more information, please contact Denver Crum at (806)257-3310.
